# **Indulge your Sweet Tooth Guilt-Free** ***All the taste with none of the sugar***

## **KUALA LUMPUR, AUGUST 2006**

FIDANI has launched a new range of chocolates that will allow diabetics and weight-watchers a way to satisfy their chocolate cravings healthily. Offering chocolates with no sugar, FIDANI Sugar Free Fine Chocolates aptly defines the luscious taste of Belgian hand-made chocolates.

The sugar-free chocolates are made with *Maltitol*, which has been found to be the perfect sugar substitute for chocolate. What's more, it won't promote tooth decay as *Maltitol* is not broken down into organic acids that affect dental enamel the way normal sugar does. By using *Maltitol* in FIDANI's chocolates, diabetics are able to enjoy the taste and textures of a once-forbidden treat without compromising on taste or quality. Those watching their weight can also indulge in chocolate without feeling guilty about sugar.

So why not enjoy FIDANI's range of high-quality chocolates and leave your worries about calories behind? Each well-presented box comes with a luxurious selection to satisfy even the pickiest of chocolate consumers. Try one today and taste the difference of FIDANI!

### **About FIDANI**
